Product Specification

Franchise: Hilton

Project: Evolution '05 Prototype

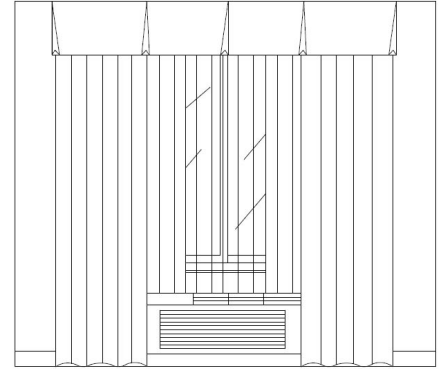

Brand: Hilton Garden Inn

Location: N/A

Item Code: 611-WT-100 Guestrooms - Drapery
Item: WT Fabrication (PTAC)

Issue Date: 07/22/2005

Print Date: 08/28/2006

Description

Top Trmt: Inverted box pleated soft valance with pleats equally spaced across the valance and the center pleat centered on the center of the window. The return shall be fourteen inches (14") deep. The valance shall have a 1" single side hem and 4" double bottom hem. All staples to be galvanized steel. Provide one x two (1 x 2 nominal) header board so valance can be ceiling mounted. Valance to run the full width of the window. Pattern match all seams. Manufacturer to provide black-out lining.

Overdrapery: Two drapery panels make-up one unit. Panels shall be operable, black-out drapes with three-fold pinch (French) pleats, finished to a minimum of 200% fullness. Drapes shall hang from ceiling to the top of the PTAC unit. Drapes shall be split traversing with 1/2" clear baton (36" long for typical guest rooms and 48" long for all ADA guest rooms) and all drapes shall pull from the center of the window. The drapes shall have a 1" single side hem, 4" single heading and 4" double bottom hem. All stitching must be overlapped and joined with safety stitching. Manufacturer to provide non-corrosive weights and heavy duty stainless steel pin hooks; pattern match all seams. The hardware should be ceiling mounted extruded aluminum architectural track. The track system to be a non-corrosive ceiling mounted system. The black-out drapes and sheers must be on two separate tracks. Manufacturer to provide black-out lining.

Side Panels: Two drapery panels make-up one unit. Panels shall be non-operable, black-out lined drapes with three-fold (French) pleats, finished to a minimum of 275% fullness. Drapes shall hang from ceiling to 1/2" above the finished floor. The drapes shall have a 1" single side hem, 4" single heading and 4" double bottom hem. All stitching must be overlapped and joined with safety stitching. Manufacturer to provide non-corrosive weights and heavy duty stainless steel pin hooks; pattern match all seams. The hardware should be ceiling mounted extruded aluminum architectural track. The track system to be a non-corrosive ceiling mounted system. Pattern match all seams. Manufacturer to provide black-out lining.

Sheers: Two drapery panels make-up one unit. Panels shall be operable, unlined drapes with three-fold pinch (French) pleats, finished to a minimum of 250% fullness. Drapes shall hang from ceiling to the top of the PTAC unit and should coordinate with the length of the over drapery so that they do not hang above or below. Drapes shall be split traversing with 1/2" clear baton (36" long for typical guest rooms and 48" long for all ADA guest rooms) and all drapes shall pull from the center of the window. The drapes shall have a 1" single side hem, 4" single heading and 4" double bottom hem. All stitching must be overlapped and joined with safety stitching. Manufacturer to provide non-corrosive weights and heavy duty stainless steel pin hooks; pattern match all seams. The hardware should be ceiling mounted extruded aluminum architectural track. The track system to be a non-corrosive ceiling mounted system. The black-out drapes and sheers must be on two separate tracks.

Other: N/A

Dimensions: **Width:** 90" **Height:** 96"

Field verify all dimensions and site conditions.

Fire Safety: Draperies must meet Class 1 ASTM E-84 and NFPA 701 Small and Large Scale as required by local and state fire codes for use in hotels.

Stain Resist: Scotchgard or equal

Notes:

1. Drapery manufacturer to verify fabric requirement before purchasing.
2. Refer to the fabric section of the specification book for an actual sample and spec information.

Special Notes: 1. Room distribution: Type "A" King (ID6.00), Type "B" Dbl Queen (ID6.01), ADA King (ID6.02), ADA Double Queen (ID6.03), Wide King Spa (ID6.04), Shotgun Suite King (ID6.05), Shotgun Suite Dbl Queen (ID6.06), Side/Side Suite Vs 1 (ID6.07), Side/Side Suite Vs 2 (ID6.08), Side/Side Suite ADA Vs 1 (ID6.09), Side/Side Suite ADA Vs 2 (ID6.10), King Spa (ID6.11)

2. The drapery to be installed with the sheers against the glass and the 3-pass black out facing the room.
